

## **Mr. Christopher M. Colyn**

### **Caster Concepts: Product Development Engineer**

Mr. Colyn has been responsible for product design and development at Caster Concepts; this includes product testing, continuous improvement projects, and standardization of existing product. He has a unique understanding of product design acquired from a personal desire to understand design which fueled his specialized education in Product Design Engineering Technology at Ferris State University. His understanding of design along with Caster Concepts state of the art testing facilities has enabled him to develop several uniquely designed products that fill demanding applications in the field. Along with his understanding of design he has 3D CAD skills which have further improved the development process at Caster Concepts.
