

V-GROOVE WHEELS

15,000 maximum capacity LBS

FEATURES

Bearings: Roller, tapered, plain
Temperature: Maximum to 800° F with proper bearing and lubrication.
Standard: All 1-1/2" and 2" width wheels with 3/4" roller bearings are supplied with 1/2" spanner bushing.

BENEFITS

V-groove wheels are constructed of premium G-3000 gray iron castings or hot forged C-1030 steel. The 90 degree grooves are accurately machined into the face of the wheels. A relief groove at the base of the "V" directs the load to each face of the angle track when in use. V-groove wheels can be used on a track, flat surface or both without fear of damage.

Exceptionally strong and ideal for heavy loads, the V-groove wheels are able to be machined out for keyway or various bore sizes.

Wheel material codes: Cast iron (15); heavy duty cast iron (16); forged steel (25); heavy duty forged steel (26)

06309-25-16 shown

APPLICATIONS

Excellent for guided industrial applications, assembly lines, paint lines and material handling where precise alignment is necessary.

Capacity listed is for manual operation.
 For powered operations, consult factory.
 ^ Dimensions for tapered bearing bore.
 * These wheels are ductile iron.
 All dimensions are in inches. All weights are in pounds.

CASTER CONCEPTS WILL MODIFY ANY CASTER TO MEET CUSTOMER SPECIFICATIONS
 Caster Concepts, Inc., 16000 E. Michigan Ave., Albion, MI 49224 (517) 629-8838 Facsimile (800) 800-0036 www.casterconcepts.com

FEATURES

Bearings: Roller, tapered roller
Temperature: Maximum to 800° with proper bearings and lubrication.
Standard: All 1-1/2" and 2" width wheels with 3/4" roller bearing are supplied with 1/2" spanner bushing.

BENEFITS

The flanged wheel is designed to operate on steel tracking to minimize guidance and rolling effort. These wheels are constructed of premium cast iron and steel for high strength and long wear. Various bore sizes are available for use with keyway or a variety of bearings.

APPLICATIONS

Flanged wheels are excellent for precise alignment of work, captive turntables or repetitive processes, including foundry cooling lines.

CASTER CONCEPTS WILL MODIFY ANY CASTER TO MEET CUSTOMER SPECIFICATIONS

Caster Concepts, Inc., 16000 E. Michigan Ave., Albion, MI 49224 (517) 629-8838 Facsimile (800) 800-0036 www.casterconcepts.com

FEATURES

These cast iron wheels are constructed of premium Class 30 gray iron for maximum load capacity and impact strength. The wheels feature heavy cross section castings for heavy duty use, abrasion resistance and a long service life. Each wheel is precision machined with rounded edges to finished tolerances.

Standard: All 1-1/2" and 2" wide wheels with 3/4" roller bearings are supplied with 1/2" spanner standard.

APPLICATIONS

Built for high capacity applications, the cast iron wheels can withstand extreme heat. Precision tapered bearings are available to complement the characteristics of the wheels.

OPTIONS

Wheel material codes: cast iron (10); heavy duty cast iron (11); ductile iron (12).

Capacity listed is for manual operation. For powered operations, consult factory.

* These wheels are cast ductile iron

All dimensions are in inches. All weights are in pounds.

CASTER CONCEPTS WILL MODIFY ANY CASTER TO MEET CUSTOMER SPECIFICATIONS

Caster Concepts, Inc., 16000 E. Michigan Ave., Albion, MI 49224 (517) 629-8838 Facsimile (800) 800-0036 www.casterconcepts.com

FEATURES

Bearings: Roller, tapered, plain, Teflon
Temperature: Maximum to 800 degrees with proper bearings and lubrication.
Standard: All 1-1/2" and 2" wide wheels are supplied with 1/2" spanner standard.

BENEFITS

Forged steel wheels are hot forged from high carbon steel billets heated to 2,400 degrees then repeatedly hit by high tonnage forging hammers. This process enhances the grain structure and increases the ductility and tensile strength (64000 psi) of the wheel. The wheels are then precision machined flat with rounded edged to finished tolerances.

Forged steel wheels offer the greatest load capacity, impact strength and rollability of all caster wheels. Wheel material codes: forged steel (20); heavy duty forged steel (21); ductile iron (12)

^ Dimensions for tapered bearing bore.

* These wheels are cast ductile iron

All dimensions are in inches. All weights are in pounds.

CASTER CONCEPTS WILL MODIFY ANY CASTER TO MEET CUSTOMER SPECIFICATIONS

Caster Concepts, Inc., 16000 E. Michigan Ave., Albion, MI 49224 (517) 629-8838 Facsimile (800) 800-0036 www.casterconcepts.com

FEATURES

Bearings: Precision ball, Delrin, straight roller and tapered
Standard: All 1-1/2" and 2" wide wheels with 3/4" roller bearings are supplied with 1/2" spanner standard.

BENEFITS

A wide selection of phenolic resin wheels are available in inventory. The wheels shown in the chart are laminated phenolic.

Laminated phenolic wheels (35) feature a continuous wound tread with a macerated canvas center. The wheels have a 40% higher impact resistance and carry up to 25% higher load than standard phenolic wheels. The continuous wrap process makes this wheel a longer wearing product that has a higher resistance to chipping and fraying.

High temperature phenolic wheels (32) provide continuous service up to 425° F and intermittently to 500° F.

Standard black phenolic wheels (30) feature macerated canvas duck compression molded with premium phenolic resins to produce a value/price relationship.

06201-30-12

APPLICATIONS

Phenolic wheels are excellent for waste bins, platform trucks, heavy material handling, autoclaves, baking ovens, curing ovens and high temperature bakery applications.

Table with columns: WHEEL CAPACITY, PART NUMBER, Dia., Width, Hub Length, Bore, Straight Roller, Precision Tapered, Ball Bearing, Wt. Includes icons for roller types and a weight icon.

All dimensions are in inches. All weights are in pounds.

PHENOLIC WHEELS ARE AVAILABLE IN DIAMETERS FROM 3" TO 18" AND CAPACITIES TO 8,000 LBS. PLEASE CONSULT THE FACTORY.

Caster Concepts has gained a reputation in the industry for application-oriented solutions to tough material handling and mobility problems. Establishing a market for custom and special casters and wheels has driven the need for developing expertise in engineering application solutions with a variety of premium urethane elastomers.

Caster Concepts, in partnership with leading producers of polyurethane prepolymers, is continually working to develop products for a wide range of customer specific needs. While there are standard “go to” products that work in a variety of applications, Caster Concepts is expanding its market reach by applying its application knowledge to solve tough performance applications in a variety of industries. Success in this area includes:

T/R COMPOUND URETHANE WHEELS

This material produces a softer durometer wheel that resists the accumulation of metal chips, sheet metal screws, and foreign objects often found in manufacturing facilities. The high rebound of this material provides increased rollability in ergonomic in-plant applications, and has become a favorite in production line delivery systems across the country.

STANDARD POLYURETHANE

Caster Concepts' standard durometer 95A polyurethane is easily identified by its Maroon color. This material is economical, provides, lower rolling resistance than rubber wheels and are floor protective.

HIGH SPEED WHEELS

Caster Concepts has worked to develop a line of wheels that will withstand the rigors of higher loads and speeds found in today's lift truck industries. These wheels are able to dissipate the heat being generated through the load, the speed, or a combination of both.

ELASTOMERS

Processed in-house, elastomers provide flexibility in material choice, hardness, and finished size. Caster Concepts is adept at processing MDI polyesters, and TDI polyether and polyesters, in a wide range of durometers from 50 durometer shore A to 70 durometer shore D scale.

T/R Compound Ergonomic wheels, excellent for manual pushed loads up to 1,500 pounds per dolly.

95A durometer high load capacity economic floor protective wheel.

70D Durometer for heavy loads, floor protection and ease of movement.

High speed urethane offers performance under severe applications.

Consult factory for your toughest applications.

FEATURES

BEARINGS

SEALED PRECISION BALL

Precision ball bearings offer the lowest rolling resistance for ergonomic applications. These bearings are often referred to as “sealed for life” due to their being rubber seals on both sides. These bearings are capable of applications where towing up to 5 mph is present, please consult the factory.

ROLLER BEARING

These commercial bearings are used when a low cost anti-friction bearing is required, they provide excellent load carrying capacity, at an economical cost.

PRECISION TAPERED

Tapered bearings are used in applications where towing and capacity are present. Tapered bearings do to their nature are adjusted tight at the factory to provide a preload thrust component to the wheel. Tapered bearings are not recommended for applications where there is a high amount of manual movement required.

DELRIN

Delrin bearings are a friction type bearing used in wet applications where light loads and infrequent movement is present.

OILITE

Oilite bearings offer a low cost friction bearing where heat, moisture, infrequent movement or lighter loads are part of the application.

TESTING

In-house test dynamometers, with sophisticated metering equipment, allow Caster Concepts to develop test parameters for product duty – life cycle profile testing and performance evaluations prior to delivery to the field.

METRIC WHEELS

The capability to control the production of wheels through design, production, product testing and final shipment, has driven Caster Concepts to design and develop a full line of metric wheels for replacement on equipment produced in Europe and Asia.

Metric wheel diameters available include:

50 mm	180 mm	230 mm
80 mm	200 mm	250 mm
125 mm	220 mm	300 mm

All dimensions are in inches. All weights are in pounds.

Caster Concepts continues to expand and develop a wide range of industrial application solutions using engineered plastics. Some of these applications include:

Vertical Drop Lift Guide and Roller Assemblies

Conveyor Accumulation Rollers

Turn Table Support and Load Wheels

High Load Capacity Caster Wheels

Caster Concepts chooses materials, which are suited to the customer's specific application, where duty cycle, environment and loads are fully understood. Engineered plastics offer lower coefficient of friction and good abrasion resistance, and excellent structural rigidity in a wide variety of applications where cast iron or steel were previously used.

Many of the compositions are filled with lubricating materials which allow applications in situations where maintenance is an issue. Materials can be dynamically tested in the Caster Concepts Engineering Test facility to duplicate duty cycle and loads prior to installation in the field.

Caster Concepts' NYTEC- MD materials are widely used as idlers and support wheels in many large turn table applications. They provide a high load capacity while also offering a material that will provide reduced noise when compared to steel.

The Caster Concepts NYTEC- HS is a heat stabilized material which is suited for higher loads, with thermal stability up to 260 degrees. This material is excellent in applications where continual use is necessary. Wheels manufactured in NYTEC- HS material have been tested under load to 2 million revolutions and have shown little or no wear to the tread surface.

Engineered Plastic Wheels and Rollers offer you additional solution opportunities for your specific application needs. Contact Caster Concepts for assistance in designing a rolling solution for you.

Floor-to-floor elevator guide wheel of NYTEC-HS

Automotive Assembly line roller flight accumulation conveyor roller

Belt Conveyor take up assembly with belt guard

FEATURES

NyTec-MD is a nylon filled material which provides a high load capacity, floor protective wheel. Wheel capacities approach those of similar cast iron and steel wheels. Nytec- MD material is resistant to most harsh environments. The non-abrasive and vibration dampening material actually provides a quieter operation when compared to steel or cast iron wheels. When used in wet environments, plain bore NyTec-MD wheels can be used as the material is self lubricating. NyTec wheels are offered with precision tapered, precision ball, and straight roller bearings. For special applications, contact the factory.

Caster Concepts, Inc., 16000 E. Michigan Ave., Albion, MI 49224 (517) 629-8838 Facsimile (800) 800-0036 www.casterconcepts.com

FEATURES

Bearings: Delrin, oilite, roller, precision ball, tapered.
Temperature: Maximum to 180° F
Durometer: 70 Durometer Shore A
Standard: All 1-1/2" and 2" width wheels with 3/4" roller bearings are supplied with 1/2" spanner bushing.

Caster Concepts offers the highest quality domestic mold on rubber wheels. Our mold-on rubber wheels consist of a soft black, 70 durometer rubber tread permanently bonded Class 30 gray iron centers. Mold-on rubber wheels provide excellent floor protection, a cushioned and quiet ride for the product being transported, and they absorb shock and vibration.

Neoprene and high load compounds are available, please contact the factory.

APPLICATIONS

Excellent for moist and wet environments, food service equipment, small waste bins, factory use, platform trucks and hotel equipment.

Caster Concepts, Inc., 16000 E. Michigan Ave., Albion, MI 49224 (517) 629-8838 Facsimile (800) 800-0036 www.casterconcepts.com

FEATURES

A wide variety of keyway drive wheels are available. Keyway drive wheels are used in various power transmission applications. The keyways are cut to fit a keywayed shaft and are held in place with two set screws. One set screw is placed over the key and one at 90 degrees to the keyway. The most popular models in rubber and soft polyurethane are shown in the charts. Keyway wheels are manufactured in other materials, forged steel or cast iron, are available. Check the wheel widths on the chart and select the appropriate bushing. Costing for specific requirements is also readily available.

Bushing	ID	OD	Length	Key	Wheel Width
KWAA	0.50	1.19	2.44	0.125	2"
KWBB	0.75	1.19	2.44	0.188	2"
KWA	0.50	1.94	3.25	0.125	2-1/2" or 3"
KWB	0.75	1.94	3.25	0.188	2-1/2" or 3"
KWC	1.00	1.94	3.25	0.250	2-1/2" or 3"
KWD	1.25	1.94	3.25	0.250	2-1/2" or 3"
KWE	1.50	2.44	4.25	0.375	4"
KWEE	1.50	2.44	5.25	0.375	5"

FEATURES

Bearings: Precision ball or straight roller

Temperature: Maximum to 230° F.

Hardness: 75 Durometer A Scale

Softech wheels feature a soft, non-marking tread on a rust-free polyolefin core. Softech wheels reject floor debris, are highly resistant to most chemicals, grease, solvents and acids, and are stain resistant and zero water absorbing. Quiet, easy rolling and shock absorbing, these wheels are excellent for most floor surfaces.

APPLICATIONS

Softech wheels are excellent for platform trucks, food service equipment, textile carts, hotel equipment and other abusive applications.

* Constructed with precision ball bearings. All dimensions are in inches. All weights are in pounds.

FEATURES

Bearings: Precision Ball or Straight Roller

Temperature: Maximum to 230° F

Hardness: 45-65 Durometer D scale

Envirothane wheels feature a solid, non-marking polyurethane used for high load capacities. This top quality wheel will not damage floors and will not develop flat spots under standing loads. Tested for medium load capacities, the Envirothane wheel is harder than soft rubber. Envirothane wheels resist most chemicals, offer good floor protection and are completely washable. The one piece solid Envirothane makes it virtually maintenance free.

APPLICATIONS

Envirothane wheels are excellent for tow line applications, platform trucks, large stock trucks, textile carts, food service equipment and other abusive applications.
