

**CASTER CONCEPTS**

Beyond Standard.

# Performance **UNDER PRESSURE**

## Introducing **PNEUMATIC CASTERS**

Designed For Heavy And Light Duty  
Industrial Applications

# CASTER CONCEPTS

Beyond Standard.

## BENEFITS

- Absorbs shock and cushions loads
- Ideal for rough or uneven terrain and outdoor applications
- Won't damage flooring
- Used in applications that combine off-road and pavement surfaces

## APPLICATIONS

- Ground Support Equipment
- Helicopter Dollies
- Maintenance Equipment
- Mobile Construction Shelters
- Manufacturing Housing Applications
- Outdoor Use
- Fragile Loads

## SPECIFICATIONS

- Wheel diameters start at 8 inches and go as high as 25 inches
- Standard pneumatic usually air-filled but can be filled with foam or nitrogen
- Load Carrying capacities ranging from 320 lbs. to 7,260 lbs.

## OPTIONS

- Brakes
- Swivel locks
- Sealed Swivels
- Toe Guards

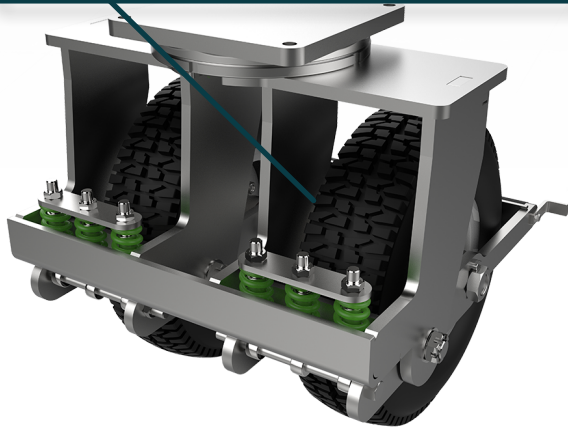

## SOLID PNEUMATIC WHEELS

- Handle greater weight capacities than standard pneumatic
- Made of solid dense rubber with hollow center
- Great for outdoor applications
- Puncture proof

## PERFECT FOR OUTDOOR APPLICATIONS

Our pneumatic wheels are great for rough surfaces including gravel, cracked cement, uneven surfaces, and other tough terrains.
